\*This list constitutes those asbestos testing laboratories audited by EPA's Office of Superfund Remediation and Technical Innovation (OSRTI), Analytical Operations/Data Quality Center (AOC) and found to demonstrate adequate technical capabilities and Quality Assurance practices for use on Superfund projects.

This list may expand or contract as future asbestos testing facilities are audited or re-audited.

Inclusion in this list does not imply "Certification" by OSRTI or EPA.

No formal contract mechanisms have been established with these laboratories through AOC. All work with these laboratories must be done under Regional contracts, credit cards, etc.

Laboratory capabilities are dynamic. Each Region should establish a working relationship with a potential laboratory to discuss specific project needs and requirements before work commences.

If you have any questions about the laboratories in the above list or any other laboratories which you are considering using for asbestos analysis, contact Terry Smith at (703) 603-8849 or [Smith.Terry@epa.gov](mailto:Smith.Terry@epa.gov).
